## Proof of Competence

Exemplar Global provides professionals around the world with proof of competence.

We create high benchmarking standards and work behind the scenes to ensure that professionals consistently provide the most competent service possible, regardless of product or industry.

To achieve the highest level of competency, Exemplar Global works extensively with standards owners, government agencies, international organizations, and industry bodies to provide proof of competence through personnel certification.

## What Is Personnel Certification?

Personnel certification is validation of overall professional excellence by an independent, third-party professional organization.

To gain certification, individuals are required to pass assessments of the knowledge, skills, and personal attribute outcomes required for a particular job.

The outcome of certification is assurance that the professional is competent and can complete the required tasks to a high standard. This provides the individual with a competitive advantage when seeking employment and assures organizations that the person has the right skills and competencies required to do the job.

Professional enhancement is the number one reason why people choose to become certified, according to a recent Exemplar Global survey.
