Achieve More with Exemplar Global

As an ASQ Certified Quality Auditor you've demonstrated your knowledge and qualifications as an internal auditor. As your career progresses, what's the next milestone to reach for?

Your CQA certification positions you well to move into a career as a third-party auditor or to continue your career as a quality professional.

Exemplar Global has the right certifications to help you achieve your goals and demonstrate your competence to a global market. Let us introduce ourselves and how we can boost your career.

What Is Exemplar Global?

Exemplar Global is a wholly owned independent subsidiary of the American Society for Quality (ASQ).

We provide personnel certification for auditors and engineers, along with third-party certification for training providers.

For close to 30 years, we've helped thousands of professionals receive global recognition of their knowledge, skills, and personal attributes.

How Exemplar Global Can Help

Exemplar Global certification can take you beyond your CQA status and showcase you to the world.

Our certifications are globally recognized and support a large community of highly educated and engaged professionals just like you to enhance their careers.

Our Quality Management System (QMS) and Certified Management System Specialist (CMSS) certifications can help you bring your skills to a wider audience.

Quality Management System Certification

Our QMS auditor certifications provide international recognition for auditors who conduct QMS audits using national or international management system standards. They are also a great way to start a career as a third-party auditor.

Exemplar Global's QMS certification is available as competency-based or qualification-based options.

Competency-based personnel certification is based on specific competencies defined by industry as requirements for professionals who work in a given industry sector, and assesses the professional's knowledge, skills, personal attributes, and qualifications. Qualification-based personnel certification is based purely on education and qualifications. Our qualification-based certification meets and exceeds the qualification guidelines described in ISO 19011:2002.

Our QMS certification has been accredited under ISO 17024. To ensure continued maximum effectiveness, a QMS requires regular performance assessment. This is best achieved by using competent auditors.

The benefits of holding Exemplar Global QMS certification include:

- International recognition for professionals managing quality management systems in accordance with ISO 9001 and ISO 19011.
- Proof of competence to effectively manage quality issues via extensive examination of knowledge, work experience, and competence to audit.

Certified Management System Specialist

Working alongside industry experts, Exemplar Global developed the CMSS program to provide international recognition for professionals who work with ISO management systems.

In accordance with ISO 19011:2011, CMSS certification provides proof of your competence to effectively manage quality issues through extensive examination of knowledge, work experience, and audit competence.

The program provides a more robust and comprehensive certification than a training certificate and demonstrates a solid understanding of management systems.

The CMSS program is suited to young professionals who assist with or lead the design, development, implementation, maintenance, or improvement of management systems. On a broader level, the program is suited to those who will be working in quality teams within their organizations—such as ISO 9001—and will be responsible for implementing or managing a quality management system.

CMSS certification offers the ultimate professional enhancement and provides a unique point of difference.

What Are the Benefits of Exemplar Global Certification?

In addition, aligning yourself with a global certification company and receiving global recognition of your knowledge, skills, and competence, Exemplar Global-certified professionals also receive additional benefits with their certification.

These benefits include access to:

- The Auditor Online—a source for auditing and standards news and information.
